Software Developer Intern

Particular Presence Technologies • Jul 2022 - Aug 2022

- Collaborate with senior developers to analyze software specifications.
- Implement features that encapsulate backend and frontend functionalities.
- Created a GraphQL API gateway to support client get and post requests.
- Implemented lambda functions using typescript and nodeJS to receive API calls and interact with DynamoDB database so that data can be sent back to the frontend.
- Styled UI components using bootstrap and Vuetify UI library, along with custom styling using Sass and CSS.
- Frontend functionality implemented using Javascript/VueJS.
