STEPHAN MINGOES ✉ ☎ in ◯

Software Developer

Kingston, Jamaica | +876-507-5393 | stephanmingoes@gmail.com

EDUCATION:

2020 - 2024| The University of The West Indies · Current GPA - 3.33
Bachelor of Science - Computer Science

SKILLS:

- Java
- Javascript/Typescript
- HTML + CSS
- React Javascript

- NextJS
- NodeJS
- ExpressJS
- MongoDB

- AWS Lambda
- Dynamo DB
- Git/Bash
- GraphQL

WORK EXPERIENCE:

Particular Presence Technologies

Software Developer Intern | 01 June, 2022 - Present

- Implemented a mockup payment feature that allowed an admin to collect, refund, reverse or authorize a financial transaction from a credit card. This was created using React JS for the user interface, and AWS Lambda functions to handle the logic for each event which was carried out using a REST API interface.
- Created a user interface for a Merchant Admin Dashboard with VueJS, bootstrap and Vuetify for component/UI-library.
- Implemented AWS lambda functions running on NodeJS written in typescript. These functions when triggered would perform the required logic to process data, this data was sent to an AWS Dynamo Database for updating/creating a new entry.
- Connect front-end queries and mutations to the backend using serverless Graphql API.

RELEVANT PROJECTS:

FACTOID - https://factoid-sc.netlify.app/ - Fact Website

Tech Stack: Javascript · React · ExpressJS · NodeJS · MongoDB

- This website allows a user to log in and post an interesting fact.
- Users can also like another person's posts, they can delete and update their own posts.
- Posts can have tags so that they can be categorized with similar posts
- Pagination prevents pages from being filled with too many posts.
- Search functionality allows a person to search for posts with a specific tag and similar wording.

JOBBO - https://jobbo-sc.netlify.app/ - Job Tracking Application

Tech Stack: Javascript · React · ExpressJS · NodeJS · MongoDB

- Jobbo is an application built so applicants can keep track of their Job hunting process.

JSON-MOCK-SERVER - https://github.com/stephanmingoes/json-mock-server

Tech Stack: ExpressJS · NodeJS

- Simple tool for turning JSON file into a fake REST API in seconds.
